

Coventry, Midlands

Ground Floor Underfloor Heating System

April 2019

A wet underfloor heating system has recently been designed and supplied by **UFH Supplies** for two plots in Coventry. Fitted by our install partners the system supplied included a DPM, insulation, separating layer, pipe and manifolds. The pipes were clipped to the floor to ensure they were securely installed. To complete the floor the underfloor heating system was covered with a liquid screed. The system was installed to provide occupants with efficient, high performance underfloor heating on demand.

UFH Supplies System

Manifold
2-12 Way High
Temperature Self
Regulating Manifold

Underfloor Heating Pipe
Highly Flexible 5-layer
PE-RT Pipe

Project Features

Underfloor heating system fully designed and supplied by UFH Supplies

Wet underfloor heating system

Fitted by one of our installation partners

Pipes pinned to insulation on ground floors

Pipes covered with a liquid screed
