

London - South East

Apartments Underfloor Heating

April 2019

UFH Supplies successfully designed and supplied a complete underfloor heating system for multiple apartments in south east London. On the ground floor the underfloor heating pipes were clipped to the insulation. On the upper floor our heat diffuser plates were fitted between the joists, with the pipe fed through them. The heat diffuser plates allow heat to transmit efficiently across the floor and provide room occupants with underfloor heating exactly when they need it.

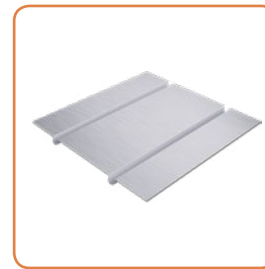

UFH Supplies System

Manifold
2-12 Way High
Temperature Self
Regulating Manifold

Underfloor Heating Pipe
Highly Flexible 5-layer
PE-RT Pipe

Heat Diffuser Plates
Aluminium 1050a H 14
Omega Profile

Project Features
