

CosyFloor®

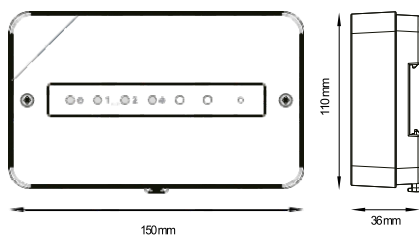

Engo ECB2-230 2 Zone wiring centre

ECB2-230

Integrator for two heating circuits with support for an additional main pump and heat source, 230V

- Enables operation of two independent heating zones
- Suitable for single-family housing (division into two heating circuits)
- Allows two types of heating to work together in one system (underfloor heating, radiators)
- It is an excellent alternative to time-consuming relay connections when installing heating controls
- It has a compact design – it fits in any installation cabinet

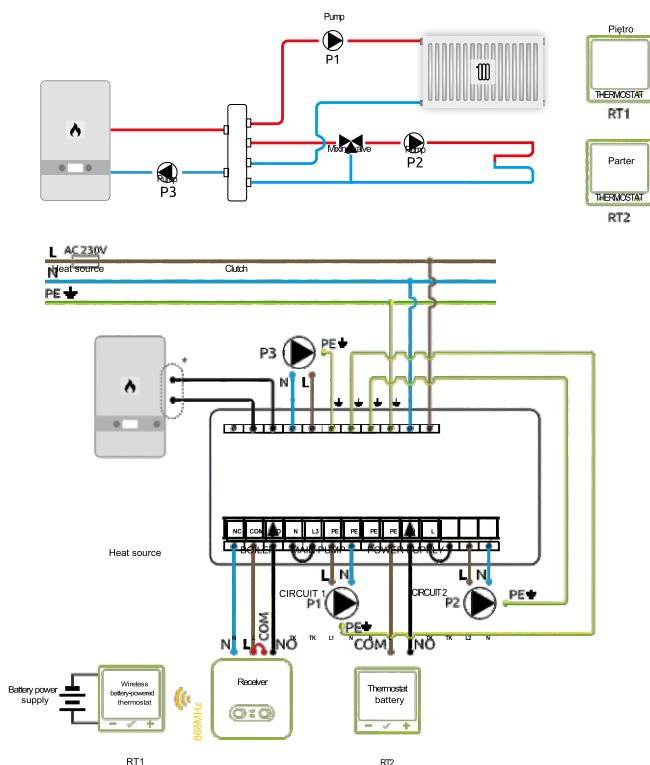

TECHNICAL DATA

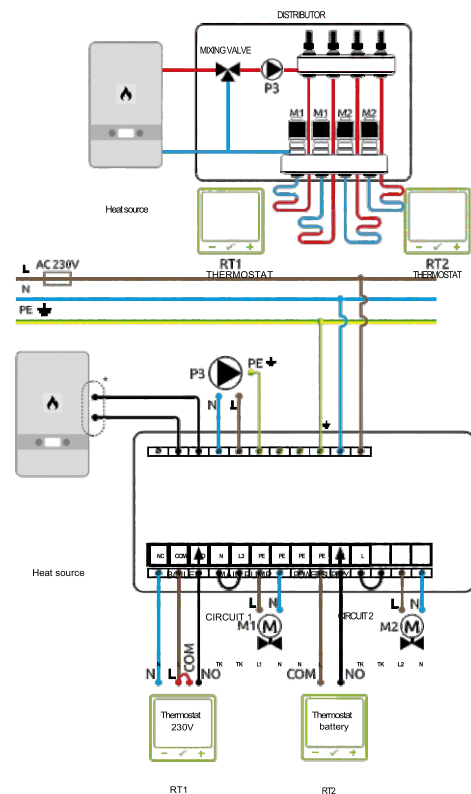

Power supply	230 V AC 50Hz
Maximum load	6 (1) A
Inputs	Pumps 230V AC max. 3 (1) A. Boiler (NO/COM/NC) max. 6 (1) A
Dimensions [mm]	150 x 110 x 35
