

## ENGO EFS300 Temperature Sensor

Protects the floor from overheating or overcooling  
(underfloor heating)

Ideal for the “comfortable floor” function in the ENGO  
ONE controller

Suitable for installation in the floor

Can also measure the temperature of the air or other  
places or devices

### Technical Information

|                   |                      |
|-------------------|----------------------|
| Measuring range   | -10° – 80°C          |
| Measuring element | NTC 10kOhm           |
| Cable length      | 3m                   |
| Cross-section     | 2×0,5mm <sup>2</sup> |
| Warranty          | 5 years              |
